• PROFILE

- As a graduate software developer, I possess a strong foundation in Information Technology and software engineering, coupled with a passion for building innovative software solutions. My academic background, coupled with relevant internships and projects, has enabled me to develop skills in programming languages such as JavaScript, Python, and C++, as well as experience with software development methodologies such as Agile and Scrum.
- I am experienced in developing and deploying software applications, databases, and APIs, and have a solid understanding of software design patterns, algorithms, and data structures. Additionally, I possess excellent communication and collaboration skills, enabling me to work effectively in a team environment and interact confidently with clients and stakeholders. I am dedicated to continuous learning and staying up-to-date with the latest industry trends and technologies, and am always eager to take on new challenges and opportunities.
- Overall, I am a driven and enthusiastic software developer with a strong technical foundation, a passion for innovation, and a commitment to delivering high-quality software solutions that meet business needs.

• EMPLOYMENT HISTORY

Backend Developer at Bincom Tech, Lagos

January 2021 — June 2021

- Developed and maintained web applications and APIs. In this role, I worked closely with the team of software engineers to design, develop, test, and deploy scalable and efficient back-end systems that power software products.
- I was responsible for implementing back-end functionalities, such as data models, views, and controllers, using Django, Python, and other related technologies. I was also involved in database design and management, as well as API development and integration with third-party services.
- I collaborated with front-end developers and designers to ensure seamless integration of the back-end systems with the user interface.

• EDUCATION

Information Technology , Middlesex University, London

September 2021 — August 2022

Graduated with a First Class Bachelor's Degree in IT.

Modules Included:

- Business Intelligence
